

**I'm Saving Lives in My Community!**

Spaying/Neutering your pets is the best solution for our nation's overpopulation problem. It will directly reduce the number of animals killed at shelters.

**I'll Live a Long & Healthy Life!**

Spayed/Neutered animals live longer lives and have a reduced risk of cancer and other illnesses.

**I Save My Family Money!**

The long-term savings is significant when considering the reduced risk of injury and disease, as well as not having to care for an unexpected litter of puppies.
